

## **Position Now Open:**

Family Practice Nurse Practitioner for our Hemophilia Treatment Center

## **Position Summary:**

The Massachusetts General Hemophilia and Thrombosis Treatment Center is hiring a Nurse Practitioner (NP) to assist in providing clinical services to both our pediatric and adult patients with hemophilia, von Willebrand's disease and other rare bleeding and thrombotic disorders due to the growth of our new program. The HTC (Hemophilia Treatment Center) is a member of Region II, the Federal Region made up of all New England states, New Jersey, New York, and Puerto Rico. Our HTC follows more than 50 hemophilia patients ages newborn to adult and we are seeking a NP who can prescribe and care for both children and adults. The Nurse Practitioner in this position will work closely with the pediatric and adult hematologists who direct our HTC. The HTC NP will report on all clinical and programmatic matters to the Medical Directors of the pediatric and adult practices of the Hemophilia and Thrombosis Treatment Center. The HTC NP will report on nursing administrative matters to the Nurse Director/Manager from each practice. The HTC NP position is a unique opportunity that combines working closely with our patients and families affected by coagulation disorders with some administrative and research responsibilities as described below.

## **Responsibilities:**

1. Directs and provides clinical care for pediatric and adult patients of the MGH HTC consistent with MGH nursing policies, procedures and standards.
2. Attends Comprehensive adult/pediatric Hemophilia clinics (currently held once per month) during which he/she provides supportive services for the attending MDs, including patient education, prescriptions, and the development of treatment plans.
3. Triage telephone calls to MGH HTC, interviews patients, provides self-care instructions
4. Communicates with other medical / surgical / dental services and acts as a liaison between various areas of patient care to ensure continuity and to provide safe and effective delivery of care for the patients.
5. Provides support to Hematology physicians in all aspects of patient care.
6. In collaboration with the 340B Program Coordinator for our HTC, directs and coordinates resources for the delivery of care to the patients and families of the Massachusetts General HTC.
7. Collaborates with our Research Coordinator regarding projects of the American Thrombosis and Hemostasis Network (ATHN) to comply with our responsibilities with regard to the CDC and HRSA.
8. Assists with patient eligibility determination for active and new research studies of ATHN, our region, and local investigators of our HTC.
9. Supports and participates in clinical research efforts of the MGH HTC and in all aspects of clinical research protocols, including IRB submissions, renewals, consenting.

10. Position involves some professional travel to regional and national meetings.
11. The position initially will be three days per week, but is expected to grow to full time as our HTC grows.

**Qualifications:**

Current certification as a Nurse Practitioner by the Commonwealth of Massachusetts, the American Nurses' Credentialing Center (ANCC), or by the National Certification Board of Pediatric Nurse Practitioners and Nurses (NCBPNP/N).

Experience and knowledge in providing care to Hematology patients, including patients with bleeding and clotting disorders, in both in-patient and out-patient settings is strongly preferred.

Experience in clinical research is a plus

Excellent communication skills.

**Interested and qualified clinicians should forward:**

- 1) CV
- 2) a statement of interest
